

Wednesday 3<sup>rd</sup> February

we are learning to make and improve a paper aeroplane.

How I feel about my learning today...

Apparatus

A4 paper

Method

we all made a dart and though it and measured it and I changed the thickness > thickness of it. - why do this

Results

Plane 1

1.8m 2.5m

Plane 2

1.9m 2.10m

Conclusion

I found out that if I make it stiffer it flew further than my other one.

Well done today Ryan. You identified an area to improve, stiffness, version and tested it well. produced an improved
